

The

SIDE LOAD

Constant Force Balance System
Patent Pending

Introducing a new option for side load windows. Manufacturers *finally* have a choice of balance systems.

Compared to block & tackle, the ***SideLoad Constant Force Balance System*** offers:

- A lower price
- Significantly reduced operating forces
- A substantial reduction of on-hand inventory with dramatically smaller space requirements

Our revolutionary, patent pending design allows for a quiet and tighter fitting sash. The system utilizes AAMA qualified springs and provides for a simple conversion from block and tackle.

John Evans' Sons, Inc., established in 1850, celebrates more than 3 decades producing constant force window balance products with the finest quality, delivery and service.

We invite you to discuss your applications with our Sales Department.
